## WORK EXPERIENCE

### Web development / javascript Instructor                                                                          GOMYCODE

25 November 2022 — NOW

Passionate JavaScript instructor at Go My Code, actively contributing to the growth and skill development of aspiring developers through a dynamic and collaborative teaching approach.

- Delivered comprehensive JavaScript instruction, designing engaging and effective learning materials.
- Worked closely with fellow instructors to create an enriched learning environment and adapt to evolving industry standards.
- Guided students through interactive coding sessions, providing real-world examples and hands-on projects to achieve a deep understanding of JavaScript concepts.
- Offered individualized assistance and constructive feedback to empower students in mastering complex coding concepts.
- Actively contributed to the continuous improvement of the curriculum, aligning it with industry trends and incorporating valuable student feedback.
-

### E-commerce Project (MERN Stack) | POLARIZED                                                                Remote

July 2023- Present

Initiated and led the development of a comprehensive e-commerce platform from the ground up, encompassing web design, copy creation, branding, and a full-stack admin dashboard.

**Role and Responsibilities:**

- Conceptualized and executed the entire project life cycle, including web design, brand development, and copy creation.
- Developed and implemented a fully functional e-commerce platform using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Designed and crafted a responsive, user-friendly interface to enhance the overall customer experience.
- Utilized Styled Components to maintain a modular and efficient styling approach.
- Currently focused on performance optimization, incorporating on-scroll animations, and adding additional features to both the website and the admin dashboard.

**Upcoming Enhancements:**

- Optimization of website performance throughImplementation of on-scroll animations to enhance user engagement and visual appeal.
- Addition of user-friendly features to the admin dashboard for improved management and monitoring.

**Technologies Used:**

MongoDB,Express.js, React.js, Node.js ,Styled Components

### Full-stack Dashboard in next                                                                                        Remote

November 2023

- Developed a full-stack dashboard project that served as an introduction to various technologies, including TypeScript, PostgreSQL, and authentication. The project utilized Next.js for the frontend, providing a responsive and dynamic user interface. TypeScript was incorporated for strong typing and enhanced code quality.
- On the backend, PostgreSQL was employed as the database to manage and store data efficiently. The project also implemented robust authentication mechanisms to ensure secure access and user-specific data.

**Technologies Used:**
- Frontend: (Next.js, TypeScript)
- Backend: (PostgreSQL, Authentication (Next auth))

## Countries api                                                    Remote
10 july 2022 — 19 july 2022

Implemented an application that enables users to get different information by integrating data from REST Countries V2 API, this application includes the following functionalities:
- Search by region/country
- Filter countries by regions.
- Accessibility to more information for each country.

TECHNOLOGIES:
- React router, reactjs, fetch API,tailwindCss

## Calculator app with theme switcher                               Remote
24 decembre 2021 — 5 janvier 2021

Created a calculator that enables users to :-
- Perform mathematical operations like addition, subtraction, multiplication, and division
- Adjust the color theme based on their preference

TECHNOLOGIES:
- vanilla javascript (ES6), OOP, CSS grid, HTML5.

## Ecommerce products detail                                         Remote
13 decembre 2021 — 22 decembre 2021

Implemented e-commerce product detail that enables users to :

- Get information about their purchases (quantity, discount, total ...) in real-time.
- Open a lightbox gallery
- Add items to their card

TECHNOLOGIES:
- vanilla javascript (ES6/ES8), CSS grid/CSS Flexbox, HTML 5.

## SKILLS & INTERESTS

**Skills:** React, NextJS, Sanity.io CMS, Node, MERN stack, express, javascript, Mongodb, SQL, tailwindCSS, Bootstrap

## EDUCATION

**ULT**                                                              **Tunis**
*Civil engineering*

**ISTEUB**                                                           **Tunis**
*Bachelor degree in Civil engineer*
